## Prostate Cancer Success Story with Alkaline Ionized Water: Washington State

IN: [ALKALINE WATER](#) | [CANCER](#)

My research into the benefits of ionized water in regards to helping cancer patients lead me to start blogging about water. I don't know how people find this blog, but they do. As a result, I continue to hear from more and more people with cancer. While cancer may have not reached epidemic levels yet, the number of people diagnosed or living with cancer is alarming. This is an inspiring story about a man who had been diagnosed with terminal prostate cancer and used ionized water to beat the disease and improve his overall health. This story was referred to me by a friend and cancer survivor, and involves one of her relatives.

" Don & I are in our 80's and have lived in Washington for our entire lives. My husband was diagnosed with terminal prostate cancer and we were told he didn't have much time. Don was getting weak and we had to make some decisions quick! We sold our home & property where we had lived for 50 yrs, as we wanted to downsize in preparation for the inevitable. The Doctors gave Don radiation tablets but things didn't look good and we weren't hopeful. Just before Christmas time 2008, Cheryel told us about this water thing. I couldn't remember much of the conversation other than she had been going through chemotherapy herself, and she kept talking about this water that she swears by.

We were interested in Cheryel's story, but Don was feeling poorly as he was having a hard time with his kidneys and we had to leave. We didn't think about the conversation again, as we were preoccupied. However my nephew showed up at our house one day shortly after Christmas with this a water ionizer that Cheryel had loaned to us. She thought it might make Don feel a little bit better at the very least.

Don has been drinking the water ever since. When Don started drinking the water his PSA was 253. When we last saw the oncologist at the end of April 2009, Don's PSA had dropped down to 1.1 and has remained at low cancer free levels ever since. Don's kidney's continue to get better.

We haven't made too many changes other than drinking the water and eating a bit better. I can't think of anything besides the water that helped Don. Whatever that water does, we love it and think everyone should drink it. Don & I want to thank Cheryel .

Don & Billy Howard, Washington State"

I want to thank the Howards for taking the time to share their story. I expect to be able to share many more similar stories in the future, as they are out there. I just need to find them.

### About this blog

My name is Rob Thomas. I'm 53 years old, retired, and I live in a small town near Toronto, Canada

I created this blog to share my knowledge and experience with alkaline ionized water. The water changed my life by eliminating my acid reflux and osteo-arthritis in 2008.

This blog morphed into something far greater than it was ever intended, as others began to share their experiences... [learn more about me](#)

thanks Rob for you in depth comment and it

I'm not a physician and I don't offer medical advice, but I believe it is both reckless and senseless to continue to leave cancer treatment up to the pharmaceutical companies and physicians. An improvement of only 5% in survival rates for cancer in 60 years is just not good enough.

As always, this article is the opinion of the author and should not be taken as medical advice. Always seek advice from your health care provider for health issues.
